Renovation of the Playpark in King George V Playing Fields

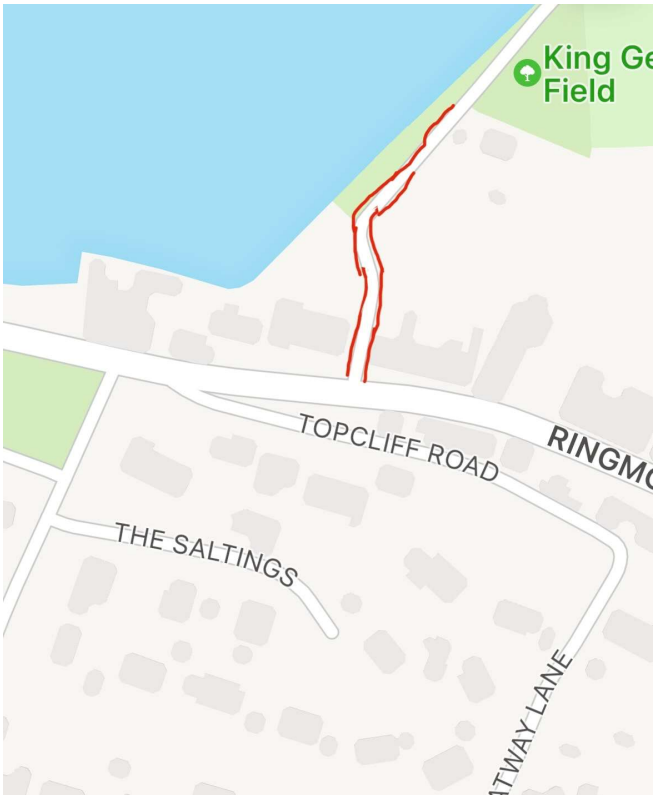

Notice of Parking Restrictions on the Embankment

Following the success of our public fundraising campaign, the complete renovation of the village children's playpark will begin on **Monday 27th January 2025**. All the existing old play equipment will be removed from the site and replaced with lots of exciting, brand new equipment. There will also be work done to make the park itself less muddy and to replace the fence around the playpark with a brand new wooden one.

Park closure To enable this extensive work to take place safely and as quickly as possible, the playpark will be fenced off and no access permitted from the 27th January until the build is complete and the park has passed a full safety inspection. Our plan is that the newly renovated playpark will be open for the start of the school Easter holidays at the end of March 2025. The pedestrian path past the playpark and the playing fields themselves will both remain open at all times throughout the work.

Parking restrictions on the Embankment To allow wide construction vehicles to access the site, there will be extensive parking restrictions along both sides of the Embankment from the 27th January. The areas marked in red in the map overleaf will be designated "no parking" areas. We anticipate that these restrictions would be required for 4 – 6 weeks but will of course remove them as soon as possible. We apologise for any inconvenience these temporary restrictions will cause to local residents but hope you agree that the new playpark will be a huge benefit to the village. We thank you lots for helping us to carry out its renovation as quickly as possible by respecting those parking restrictions and so maintaining access for our contractors.

Parking Restrictions from 27th January 2025

Areas in which no parking will be permitted are marked in red above. Access to residents' own parking off The Embankment will of course be permitted and maintained.
